

# VIBRATOR VIBE THERAPY DIVE

## User manual

### CONTROL

- 1) The bottom of the vibrator serves as a cover for the batteries.
- 2) To turn on the vibrator, remove the battery cover, insert 2 AAA batteries (not included) and screw the cover back on.
- 3) There is also a power button on the cover (with a wave symbol).
- 4) Subsequent short presses change the vibration rhythms.
- 5) To switch off the vibrator, hold the button for approx. 3 seconds.

### MAINTENANCE

After each use, rinse the vibrator with lukewarm water and soapy detergent.

You can also use an **erotic cleaner**, which also helps to remove microscopic dirt.

Simply spray the product, leave it on for about 1 minute and then dry with a towel or cloth that does not leak fibers.

### WATERPROOF

The vibrator is **waterproof**, so maintenance is very easy.

It may get splashed with water, but you can safely immerse it in water and enjoy water play.

### LUBRICATION

Use only **water-based lubricants**. Other lubricating gels could damage the surface of the aid and it could become sticky.

### DRIVE AND CHARGING

The vibrator is powered by two AAA batteries.

For greater endurance, we recommend using alkaline or rechargeable batteries.

### STORAGE

Store separately from other erotic aids in a dry and dark place.

### PACKAGING CONTENTS

Vibrator.
